

ASSIGNMENT

Implement simple Windows Forms application with the following functionalities:

- Displays all Employees
- Displays all Tasks for selected Employee
- Adds new Employee (add your full name and surname as new employee)
- Adds new Task for selected Employee (add tasks only under your name)
- Deletes selected Task

After creating or deleting tasks, the user interface should refresh and reflect that changes. **Using Entity Framework in this assignment is mandatory.**

Employees:

	Id	FirstName	LastName
	1	Ana	Horvat
▶	2	Petar	Horvat
	3	Ivan	Novak
	5	Marko	Ivic

Tasks:

	Id	Description	Priority	Completed
▶	6	Design login feature	1	<input checked="" type="checkbox"/>
	7	Develop login	1	<input type="checkbox"/>

First name: Last name:

Description: Priority:

The data can be found in tables **Employees** and **Tasks**, in database **EF_DB** on our **PISERVER** (31.147.204.119\PISERVER,1433). Login details are as follows: [user id=EFUser1;password=labs2020](#)

Tables in database are structured according to following diagram.
